Professional Summary

Entry-level Data Analyst and Mechanical Engineering graduate with internship experience at Tap Academy and hands-on project experience in SQL, Python, Excel, and Power BI. Transitioning from engineering to analytics by applying problem-solving, quantitative reasoning, and structured analysis to business data. Skilled in data cleaning, exploratory data analysis (EDA), statistical analysis, KPI reporting, and dashboard development. Familiar with ETL and data transformation concepts through hands-on data analysis projects.

Technical Skills

SQL: Joins, Aggregations, Subqueries, Window Functions
Python: Pandas, NumPy, Matplotlib, Seaborn
Excel: Pivot Tables, VLOOKUP, Charts, Data Cleaning
Power BI: Dashboards, DAX, KPI Cards, Slicers
Analytics: EDA, Statistical Analysis, Data Visualization, KPI Reporting
Data Preparation: ETL Concepts, Data Cleaning, Data Transformation
Databases: MySQL, PostgreSQL, SQL Server
Tools: GitHub, VS Code, Jupyter Notebook

Professional Experience

Data Analyst Intern | Tap Academy **June 2026 – Present**

- Clean and validate datasets using Excel, SQL, and Python to improve data consistency and prepare analysis-ready data.
- Write SQL queries using joins, aggregations, and window functions to summarize business metrics and identify trends.
- Develop Power BI dashboards with KPI cards and slicers to communicate findings through clear data visualizations.
- Support exploratory data analysis, data transformation, and reporting tasks to turn raw data into actionable insights.

Projects

Swiggy Sales and Order Analysis *SQL, Python, Excel, Power BI*

- Analyzed 197,430 food orders to examine sales, order volume, pricing, ratings, locations, and food categories.
- Used SQL, Excel, and Python for data analysis and developed a Power BI dashboard with KPI cards.
- **Key Insight:** Compared sales and order patterns across locations and food categories to identify differences in performance within the dataset.
- **Repositories:** Excel | SQL | Python | Power BI

Bank Loan Analysis *SQL, Python, Excel, Power BI*

- Analyzed 38,576 loan records across 50 states to examine loan performance and repayment outcomes.
- Used SQL aggregations and Python to analyze repayment categories and developed a dashboard for lending KPIs.
- **Key Insight:** 83.3% of loans were fully paid, while 13.8% were charged off in the analyzed dataset.
- **Repositories:** Excel | SQL | Python | Power BI

HR Analytics *SQL, Python, Excel, Power BI*

- Analyzed 1,470 employee records across three departments to examine workforce composition and employee attrition.
- Calculated attrition KPIs using SQL and Python and created a dashboard with department-level filters.
- **Key Insight:** The dataset recorded 237 employee departures, representing an overall attrition rate of 16.1%.
- **Repositories:** Excel | SQL | Python | Power BI

Education

B.Tech in Mechanical Engineering **2022–2026**
Madanapalle Institute of Technology and Science CGPA: 7.5/10

Intermediate, MPC **2020–2022**
Pratiba Junior College 77.7%

SSC **2020**
ZPH School, Ramapuram 91%

Certifications and Achievements

- Python Libraries for Data Science – Simplilearn SkillUp
- Introduction to SQL – Simplilearn SkillUp
- Analytics Vidhya – Certificate of Completion
- Data Analyst Virtual Job Simulation – Forage
- Google Data Analytics Certificate
- Solved 75+ SQL problems on LeetCode
- Best Paper Presentation – Mechonance 2023, National Technical Symposium
